EDUCATION

University of Pittsburgh | *GPA: 3.77/4.0*

Pittsburgh, PA

Bachelor of Science in Computer Science & Data Science, Minor in Korean

Expected May 2027

- **Relevant Coursework:** Database Management Systems, Data Structures & Algorithms II, Software Engineering, Operating Systems, Intro to Machine Learning, Intro to AI, Intro to System Software, Computer Organization & Assembly
- **Student Orgs:** President: Central Church Student Fellowship, Treasurer: Korean Student Association, Computer Science Club

AI PROJECTS

CENTRAL — Church Operating System | *Next.js, Supabase, Tailwind CSS, TypeScript*

Aug. 2025 – Present

- Designed and deployed a multi-tenant church platform serving 200+ users for Korean Central Church of Pittsburgh, replacing FB Messenger, Google Drive, and WorshipTools workflows with unified, tailored messaging, announcements, and planning tools
- Engineered AI slide generation via Anthropic API, OCR chart parsing via Tesseract.js, and automated worship prep pipeline
- Implemented JWT auth, 5 role tiers with team-scoped JSONB permissions, and immutable audit log across all admin actions
- Built fairness-constrained small group algorithm balancing gender, grade, and historical pairings across 14 church groups

PRISM — Real-Time Incident Command System | *React, Django, Supabase, Mistral AI*

Jan. 2026 – Feb. 2026

- Invented dashboard for Incident Commanders and EMS/fire units, with live unit tracking across 4 operational states
- Enabled searchable event timeline & ambulance depletion tracking using LogEntry audit system recording unit status transitions
- Streamlined emergency dispatching by feeding recorded unit status into Mistral AI to generate engine & ambulance estimates

TECHNICAL EXPERIENCE

PNC Financial Services | *Machine Learning Operations*

June 2026 – Present

Software Engineering Intern

Pittsburgh, PA

- Built production inference pipeline for home-equity marketing model on AWS, transforming a template into live scoring pipeline
- Reduced Debit Card Fraud Model runtime by 60% on multi-table PySpark joins via partitioning, and chunk-size tuning
- Operated batch inference for a Tier 1 XGBoost fraud detection model on on-prem Spark, scoring 9M+ records per cycle
- Engineered PySpark feature and output schemas for customer-level scoring, resolving null and training consistency for 2 models

Chaeum J.Com | *Independent Contractor*

May 2025 – Aug. 2025

Design Engineer

Seoul, South Korea

- Built Astro 5 portfolio site for a Seoul real estate advertising agency, replacing internal documents with interactive web presence
- Conceived "Tower" navigation metaphor via elevator progress indicator & passive scrolling into active floor-by-floor exploration
- Crafted KR/ENG typographic system across 4 typefaces & a blueprint-grid identity, leading with agency's manifesto for trust
- Engineered build-time image pipeline converting JPEGs to content-hashed WebP & TypeScript data layer for 24 portfolio pieces

COMMUNITY EXPERIENCE

Korean Central Church of Pittsburgh | *Central Church Student Fellowship*

Aug. 2025 – Present

Finance & Operations Director

Pittsburgh, PA

- Managed \$5.8K budget supporting a 197-member non-profit organization, enriching retreats, missions, and community events
- Wrote and secured \$1.5K in grant funding and \$2K in allocations, growing the organization budget 3.9× from prior years
- Drafted 3 guest-speaker contracts coordinating fees, terms, and logistics for organization wide retreats and seminars
- Oversaw fiscal planning, purchasing, and reimbursements across 8 events per semester in adherence to church's funding policy

Undergraduate Teaching Assistant | *Data Structures & Algorithms II*

January 2025 – May 2026

University of Pittsburgh

Pittsburgh, PA

- Provided implementation and student feedback, informing redesign of course projects around real-world cybersecurity scenarios
- Instructed recitations, lead office hours, and graded coursework, covering data structures, complexity analysis, and optimization
- Made 200+ review slides & practice sheets, resulting in 15% increase in average exam scores for 60+ students across 3 semesters

Peer Tutor | *Computer and Information Science Department*

Aug 2024 – May 2026

University of Pittsburgh

Pittsburgh, PA

- Held 20 weekly hours of bookable tutoring across DSA II, Computer Organization & Assembly, and Intermediate Programming
- Mentored students through project planning, implementation, and debugging, prioritizing understanding over handing answers
- Created custom exam review materials and adapted explanations to each student's level & points of confusion for 35+ students

TECHNICAL SKILLS

Languages: Python, SQL, Java, C, TypeScript, JavaScript, R, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, PySpark, Django, AWS SageMaker, Pandas, PostgreSQL, TailwindCSS

Developer Tools: Docker, Kubernetes, Git, Supabase, Linux, Vercel, Render, Stripe, VS Code, R Studio, Sanity CMS
